

EMVIA Acoustic Raspberry Pi Bring-up

Ver 1.0
9/20/2018

Imaging

1. Download Raspbian Stretch Desktop to PC/Laptop from <https://www.raspberrypi.org/downloads/raspbian/>
2. Insert MicroSD card into PC/Laptop and follow imaging instructions using Etcher from <https://www.raspberrypi.org/documentation/installation/installing-images/README.md>
3. Move MicroSD card to Pi, connect keyboard/mouse/monitor and boot
4. Follow instructions, connect wifi, and update. Use password "pi" for ease of use.
5. After reboot:
 - a. Edit /boot/config.txt and add "enable_uart=1" at the end
 - b. Edit /boot/cmdline.txt and remove "console=serial0,115200"
 - c. `systemctl enable ssh`
 - d. `sudo apt-get install gpsd libgps-dev libasound2 libasound2-dev ffmpeg libbluetooth-dev`
 - e. Edit /etc/rc.local and add "chmod a+w /sys/class/leds/led1/brightness" before the last line
 - f. Edit /etc/default/gpsd and add "/dev/serial0" to DEVICES
 - g. `cd ~/Desktop ; git clone https://github.com/solnus/emvia.git`

Additional Hardware Configuration

1. Wire the GPS receiver to the rpi pins 1, 6, and 10 for 3.3V, GND, and UART0 RX.
2. Connect the microphone USB to any port.
